

## Tooele Army Depot

Tooele Army Depot (TEAD) is a leading U.S. Army installation with proven expertise in engineering, maintenance and logistics. Through our quality-driven services, we offer a significant value to our customer relationships by helping them take on a number of programs. We provide our partners with an environment that helps develop new technology and capabilities that reduce the need for extensive support and infrastructure.

We value strategic partnerships with industry and encourage you to contact our Business Development team to discuss future opportunities. Our team of experts are ready to help guide you through the partnering process and develop a program encouraging mutual success.

The depot is located approximately 32 miles, 45 minutes travel time, from Salt Lake City, Utah. Take Interstate 80 West to Utah Highway 36 (UT36). Take UT36 passing through Tooele, UT for another 2 miles.

**ALWAYS AT THE READY**

**ALWAYS AT THE READY**

**Partnering with  
Tooele Army Depot**

# Tooele Army Depot's mission is one of readiness.

➤➤ **What is a Public Private Partnership?** There are a number of ways to enter into a Public-Private Partnership (P3) with Tooele Army Depot. Ranging in various forms of teaming agreements, work share agreements or leasing facilities or equipment, these agreements match capabilities between groups to accomplish organizational objectives.

## Types of P3 at TEAD

- Direct Sales
- Facility Use Agreements
- Work Share Agreements
- Subcontracting

To start a partnership, each organization will begin by exploring opportunities and establishing that an agreement to partner that is best for both parties. Each organization will then jointly develop a P3 strategy for a long-term relationship. This process allows for the creation of a team culture while reducing risk and ensuring constant communication between both parties.

Our Direct Sales opportunity provides industry partners the ability to limit partnerships to the agreement. This limits the risk of organizations, allowing them to still bid on other quotes with other organizations. In this agreement, no funds are shared between partners, but only position the team for future opportunities.

## What Statutory and Regulatory Provisions are used?

**10 USC 2208H:** The Secretary of Defense has prescribed regulations governing the operation of activities and use of inventories that authorizes supplies to be sold to, services to be rendered or work to be performed for persons outside the DoD. For working capital fund facilities (including TEAD), services available in financed inventories may be sold to contractors for use in performing contracts with the DoD provided that the organization is reimbursed for supplies sold, services rendered or for work performed by charges to applicable appropriations or payments received in cash.

**10 USC 2539b:** This allows DoD laboratories or test facilities to sell, rent, lend or give samples, drawings or manufacturing or other information (subject to rights of third persons); sell, rent, or lend government equipment or material for use on independent research and development projects; or make available services for testing to any United States person.

**10 USC 4543:** This authority is established for U.S. Army working capital fund facilities who may sell articles to perform services outside of DoD under specific conditions. Authority allows for development of new products, used for incorporation of items to be sold to or used by U.S.-based

organizations, incorporation of items to be sold to or used in contact for purposes of soliciting contracts with a friendly foreign government, and lastly for commercial products.

**10 USC 4544:** Pertaining to U.S. Army industrial facilities: cooperative activities with non-Army entities. A working capital funded industrial facility may enter into contract or other cooperative arrangement with a non-Army entity to carry out with the non-Army entity a military or commercial project.

**22 USC 2770:** Allow for the manufacture, sale, or defense for incorporation into end items to be sold on a direct commercial basis to friendly foreign nations. In case of some ammunition parts, restrictions are in place that restricts delivery directly to the friendly foreign country or international organization.
